

PUBLIC UNIVERSITY EMPLOYEE HANDBOOK RULES — PTO ACCRUAL AND TUITION REIMBURSEMENT (DIGEST)

PTO accrual by hours worked (University of South Alabama / USA Health pattern)

Accrual is computed from hours worked, capped at 40 hours per week, multiplied by an accrual factor set by length of service:

COMPLETED SERVICE	FACTOR (PTO HOURS PER HOUR WORKED)	ANNUAL ACCRUAL AT 40 H/WEEK
Under 5 years	0.0961	$0.0961 \times 40 \times 52 \approx 200$ hours
5–9 years	0.1154	≈ 240 hours
10+ years	0.1346	≈ 280 hours

The synthetic Acme handbook (SYN-005 § 4.1) uses this same factor structure, so the Catala accrual module is validated against a real published formula.

Tuition / educational assistance reimbursement (UT Health Houston pattern)

- Reimbursement is capped at **\$5,250 per calendar year**, the amount excludable from income under 26 U.S.C. § 127.
- Eligibility is gated on grade: **C or better** for undergraduate coursework, **B or better** for graduate coursework.
- Coursework must be job-related or part of a degree program approved in advance.

Rule shape: `annual_reimbursement = min(eligible_cost, $5,250)` subject to a boolean grade-eligibility gate — a clean two-input Catala scope, available if the demo needs a fourth module.

Penn / UC patterns (not encoded, recorded for reference)

- PTO accrual tiered by years of service with monthly accrual mechanics, and up to five days available on hire (Penn).
- Sick leave minimums and interaction with FMLA leave (UC PPSM-2.210).
